(54) CONTROLLING SYSTEM FOR SENDING DIAL TONE

(57)Abstract:

PURPOSE: To easily identify the trunk line call allowable class of an extension telephone set while listening to a dial signal only by providing ≥ 2 kinds of dial tone sources to extension subscribers and a means for applying transmission control of a dial tone from each dial tone source.

CONSTITUTION: An extension subscriber hooks off an extension telephone set 1, it is detected by a controller 5. The controller 5 identifies the trunk line allowable class of the extension 1, applies the connection of a connection path 7 of a switch 6 when the trunk line call is allowed to connect the extension 1 and, 1st dial tone source 3, and applies the connection of a connection path 8 of the switch 6 to connect the extension 1 and a 2nd dial tone source 4. The extension subscriber of the extension 1 listens to different kinds of dial tone to recognize the propriety of the trunk line call of the said extension 1.
